

**Mr. Microgravity's**

## Scale Solar System Kit

Included in the kit is a CD-ROM containing a spreadsheet to create a scale solar system in a size that fits your needs. Explanatory presentation charts about scale solar systems are also on the CD.

The kit is available with several options. The basic kit includes a Sun and nine planets (we include Pluto for history), the CD-ROM, sizing spreadsheet, explanatory charts, color planet chart, and a color Sun chart. Some simple assembly is required to attach the planets to the cards and then the cards to sticks. This assembly may be a student project.

One option is to order a set of mounting 'sticks' to hold the planets for outdoor installation along a sidewalk, park, or beach (for example). These are normally available locally, but can be ordered if necessary.

Another option is a completely assembled set of planets and Sun on sticks.
