

Mr. Microgravity's

Microgravity Demonstration Kit for classroom use

Bring microgravity into your classroom!

Demonstrate how astronauts “float” in the International Space Station.

Demonstrate free fall and orbits and show how they are related!

Show students that it is not “zero-gravity” up in space.

Make a feather fall at 9.8 m/s^2 .

Demonstrate Newton's Laws.

And More!

A very important component of the kit is the booklet that explains the concepts and application of the demonstrations to space flight and exploration.

The complete kit includes the booklet and all components shown in the figure except for the two clear empty bottles. Information is supplied to allow *Leaky Water Bottles* and *Astronauts In Bottles* to be made for each student. Some minor assembly is necessary using recycled plastic bottles.

Please send questions by e-mail to:

00ug00@gmail.com

Those are zeroes, not O's in the address.

Complete kit price is \$26.00.

Shipping & Handling is \$5.00 (U.S.A.)

Total: \$31.00
